Certification

- Has successfully completed Android (14) app development course by Udemy®
(Certification no: UC-52487026-97d9-47ae-9bb2-5a58eeeff951)
- Has successfully completed Python (basic) by Hacker Rank
(Certification no: F58ECD229FE5)

PROJECTS:

FARMCONNECT

A multilingual educational website designed to empower farmers with essential knowledge about crop growth techniques, farming best practices, and tips to improve agricultural productivity. The platform also includes an e-commerce section where farmers can browse and purchase essential farming products.

Frontend: HTML, CSS, BOOTSTRAP AND JAVASCRIPT.

Backend: Node JS and Express JS

Database: MySQL

BREEZE

A weather application built using Kotlin, providing real-time weather information through the OpenWeatherMap API. The app allows users to check weather updates, including temperature, humidity, and conditions for multiple locations in an intuitive and user-friendly interface.

Frontend: Kotlin

Backend: OpenWeatherMap API

Budget Buddy

A cross-platform expense-tracking mobile application developed using Flutter and Dart, providing users with an intuitive interface to record, categorize, and manage daily expenses efficiently.

Frontend: Flutter

Database: SQL Lite and Shared Preferences.
